

Provides full ASN compliance to satisfy your Customer needs

NEASN Fact Sheet

- User-friendly graphical interface helping eliminate errors and providing accurate ASN's
- Automatically creates your Pallet Labels and Manifest ready for printing
- Helping your business achieve efficient, on-time delivery
- Provide order visibility to your warehouse to assist in the management of shipments
- ASN's automatically validated ensuring transactions conform to trading partner specifications
- End to end visibility of all your EDI transactions, track your ASN all the way to the partner

Simple, intuitive Order picking...

- Saving precious user-time and resources by eliminating traditional processes and exchanging paper documents between the order desk and warehouse.

Ensuring Trading Partner Label Compliance...

- The importance of creating trading partner compliant labels is vital in an environment where the emphasis is placed on ensuring error-free on-time delivery

Despatching your goods with peace of mind...

- NEASN offers a flexible and user friendly environment to ensure a high degree of accuracy is achieved for even novice users. You can be confident that your ASN is transmitted successfully and your goods are shipped on time.

Meeting Trading Partners needs at a low cost...

- NetEDI are committed to delivering high quality services at a low cost. The NEASN solution fully complies with Trading partners ASN standards and specifications whilst offering a full and cost efficient service.

How your business benefits from the electronic ASN

An ASN (Advanced Shipment Notification) is an electronic Delivery Note. Used in conjunction with the SSCC Pallet label, an ASN allows the depot to receive a delivery from the Supplier with minimal or no manual intervention. The benefits? Speeding up turn-around times, maximising efficiency and keeping costs to a minimum.
