## Cloud based B2B Integration platform for Sage 200

### Sage 200 Integration Fact Sheet

#### Integration in a cloud environment

Order processing is a fast-paced operation involving multiple people, departments and critical transactions. And your customers want to know when their orders have been received, are in-process or are en route for fulfilment. But the processes that support your sales orders – such as auditing and customer feedback – are often manual.

The NetIX solution for sales order processing addresses these issues by providing an on-demand solution, the web services framework seamlessly connects you and your trading partners through the Sage 200 interface.

#### Benefits of NEAdapter for Sage 200

Rapid deployment

Reduction in licensing, training, and support costs of adding additional users
