Innovative Network-as-a-Service platform, provides real-time visibility

NetEDI VAN Services

NetEDI VAN powered by Loren Data Corporation, offer a Value Added Network service to customers and software providers.

Connected to over 90 networks throughout the world, NetEDI offers high visibility, monitoring and administration features not traditionally available on EDI networks.

Give your users the ability to monitor their own messages online and free up valuable support resource. NetEDI promise to reduce Network charges enabling end-users to benefit from cost-savings whilst also increasing additional services.

The most popular Internet based file transfer methods used by companies are AS2, HTTP(S) and Secure FTP. All of these connectivity options are available through netEDI VAN.

The service enables you to electronically exchange any type of document (EDI, XML, CSV, Flat File and any other document types which are instrumental in your electronic interactions) automatically, seamlessly and without human intervention with your trading community while managing only a single data connection.

Easy to Implement

NetEDI will supply you with a free plug-in component that can be used in your development environment to expedite your development timescales.

The NetEDIComs Component is all you need to communicate with your trading partners.

It is available via code snippets designed to get you up and running in no time. Easily downloadable, you can find it through our company website, www.netedi.co.uk.

Alternatively, for a one-off setup fee, establish an AS2 or FTP connection to send/receive messages via NetEDI.

Reliability

- Powered by the Loren Data Corporation Network with over 20 years experience
- Highly Available Network operations (99.97%+ uptime)
- Disaster recovery planning and testing
- Network Monitoring to ensure exceptional network availability

For Vendors/Resellers looking for a practical, cost efficient way to manage your Customer VAN community, NetEDI utilises Microsoft Silverlight to bring you their web based Network Control panel.

The panel provides direct access to your mailbox administration. Monitor traffic, add Users, Mailboxes, Interconnects and Carbon Copy items at will.

For current EDI users paying high VAN network charges we can help significantly lower your traffic costs.

- Arrange a simple pricing plan to satisfy your business needs
- No separate charges to your trading community
- Pay-as-you-go, pay-monthly or pay-annually options
- 90 day Archiving. Upto 7 years as an optional extra
- Message Restore

No Charges for:

- Unlimited interconnects to over 90 VAN's
- Migration to NetEDI VAN
- Trading Partner On-boarding

NeGRID is ideal for companies that:

- Are looking for a simple, more flexible approach in managing their customers Network needs
- Are using a current EDI solution but are facing high costs for network traffic
- Are struggling to manage the different communication protocols used by their Partners
- Are looking to build a mobile connected network (PDA, Blackberry, Pocket PC's etc.)

Access your mailbox on-the-go

Why be restricted to the office when it comes to monitoring? NetEDI utilises the mobile device Windows 5.0 environment meaning you can access your mailbox whilst on the go.

WHAT YOU NEED TO DO NOW:

Whether you are an existing EDI user or a have a requirement to get involved in EDI, to find out more about this versatile, cost effective solution, please get in touch.

Please call or email us and we will provide you with further details.
