ScS has nearly 100 stores across the country, from as far north as Dundee, all the way down to Southampton and employs more than 1,400 people across the UK.

ScS has evolved from a general home furnishing store into one of the UK's leading sofa and carpet specialists. The business was founded in 1894, in Sunderland, Tyne and Wear. Over the next 100 years, ScS has experienced huge growth, thanks to their focus on quality sofas and carpets and putting their customers first.

Cloud-based and easy to use

Integrated with ScS's NAV software

Fully-managed with 24/7 support

ScS wanted to streamline their purchasing process and reduce the amount of paper invoices across their offices.

Their EDI solution also had to automatically export and import data with NAV and ensure data integrity. The solution had to be simple to use and provide full visibility

of the whole process. NetEDI developed bespoke direct connections to meet ScS's requirements for Dynamics NAV.

NetEDI provided a full end-to-end service and a one-stop-shop for implementing EDI, whilst ensuring communication between all parties was clear and consistent.

“Working with NetEDI was straight forward. They were flexible, responsive and if there was a glitch, they were very good at finding the problem.” Martin Dale, ScS

As a result of implementing EDI,
ScS were able to **significantly**
reduce paperwork and **streamline**
the **purchasing process**.

We collaborated with The NAV People (ScS's NAV reseller) to ensure that automatic processes would replace the manual ones. NetEDI provided a full end-to-end service for ScS, from developing NAV specific code to on-boarding suppliers and offering advice and support.

As a result of implementing EDI, ScS were able to significantly reduce paperwork, streamline the purchasing process, free up their finance team and avoid extra recruitment.

“300,000 of our invoices are now automated each year. It means we can now focus resource in value areas that improve supplier experience and business relationships.”

“We needed to work with a company that was flexible, understood NAV and our EDI requirements, and could liaise with our suppliers. NetEDI understood our requirements and built a solution to meet our needs.”

Martin Dale, Operations Director.
